E-mail: amitay7589288@gmail.com
Mobile: + 91-6202266267

SKILLS

• Languages:	C++, Python, JavaScript, SQL, HTML, CSS,C
• Frameworks:	React.js, Flask, FastAPI, Tailwind CSS, NumPy, OpenCV
• Databases:	PostgreSQL, SQL
• Tools:	Git, GitHub, Wireshark, Linux, VS Code,
• Core Concepts:	Data Structures & Algorithms, OOP, DBMS, Computer Networks, REST APIs
• Soft Skills:	Problem Solving, Analytical Thinking, Teamwork, Communication, Adaptability

PROJECTS

AmiVest AI – AI-Powered Personal Finance Platform | [GitHub](#) May 2026

- Developed a full-stack AI-powered personal finance platform integrating 5+ major modules including transactions, budgets, savings goals, investments, and financial insights.
- Built an AI assistant supporting 10+ natural-language financial actions while separating AI responses from backend-controlled database operations.
- Implemented backend-controlled financial operations with validation and authorization, achieving 100% separation of AI responses from direct database execution for safer financial data handling..
- Technologies: React.js, Python, Flask/FastAPI, MySQL, AI/LLM APIs

Smart Gate – Face Recognition Attendance System | [GitHub](#) Dec 2025

- Developed a Python-based automated attendance system using computer vision to perform face detection, recognition, and attendance recording.
- Automated approximately 90% of the manual attendance workflow, reducing the need for manual identity verification and attendance entry.
- Integrated OpenCV, Face Recognition, and NumPy to provide real-time identity verification with 3+ core computer-vision components..
- Technologies: Python, OpenCV, Face Recognition, NumPy

Hyper-Local Delivery Platform | [GitHub](#) Dec 2025

- Built a web-based hyper-local delivery platform connecting customers with nearby stores and delivery partners.
- Implemented 4+ core features including user registration, product browsing, order placement, and delivery tracking, automating approximately 70% of the basic ordering workflow.
- Designed a simple frontend-backend-database architecture, reducing manual order-management effort by approximately 70% through digital order processing.
- Technologies: HTML, CSS, JavaScript, React.js, Python, Flask, MySQL

TRAINING

Programming Fundamentals using Python | Infosys Springboard July 2026

- Completed structured training focused on Python programming fundamentals and practical coding concepts.
- Strengthened programming logic and problem-solving skills through course-based learning and programming exercises.
- Applied Python fundamentals to develop a stronger foundation for software development and technical problem solving.

CERTIFICATIONS

• Data Privacy, Security, Governance, Risk and Compliance SkillUp Certificate	July 2026
• Oracle Data Platform 2025 Certified Foundations Associate Oracle University Certificate	May 2026
• Data Structures in C++ Great Learning Academy Certificate	Mar 2026
• Programming Fundamentals using Python Infosys Springboard Certificate	Dec 2025

ACHIEVEMENTS

- Developed AmiVest AI, a personal-finance platform integrating AI with backend services and database-driven financial management.
- Solved 150+ Python programming problems on Codetantra, demonstrating consistent programming practice and logical reasoning.

EDUCATION

• Lovely Professional University Bachelor of Technology - Computer Science and Engineering: CGPA: 7.68	Punjab, India Aug 2025 - Present
• Delhi Public School Ranchi Intermediate: Percentage: 7 2%	Ranchi, Jharkhand Apr 2024 - Mar 2025
